

Geography Policy

Aims and objectives

Geography teaches an understanding of places and environments. Through their work in geography, children learn about their local area and compare their life in this area with that in other regions in the United Kingdom and in the rest of the world. They learn how to draw and interpret maps and they develop the skills of research, investigation, analysis and problem-solving. Through their growing knowledge and understanding of human geography, children gain an appreciation of life in other cultures. Geography teaching also motivates children to find out about the physical world and enables them to recognize the importance of sustainable development for the future of mankind.

The aims of geography are:

- to enable children to gain knowledge and understanding of places in the world;
- to increase children's knowledge of other cultures and, in so doing, teach a respect and understanding of what it means to be a positive citizen in a multi-cultural country;
- to allow children to learn graphic skills, including how to use, draw and interpret maps;
- to enable children to know and understand environmental problems at a local, regional and global level;
- to encourage in children a commitment to sustainable development and an appreciation of what 'global citizenship' means;
- to develop a variety of other skills, including those of enquiry, problem solving, ICT, investigation and how to present their conclusions in the most appropriate way.

Teaching and learning style

The subject provides many opportunities for cross-curricular links. We use a variety of teaching and learning styles in our Geography lessons. We believe in whole-class teaching methods and we combine these with enquiry-based research activities. We encourage children to ask as well as answer geographical questions. We offer them the opportunity to use a variety of data, such as maps, statistics, graphs, pictures, and aerial photographs, and we enable them to use ICT in geography lessons where this serves to enhance their learning. Children take part in role-play and discussions, and they present reports to the rest of the class. They engage in a wide variety of problem-solving activities. Wherever possible, we involve the children in 'real' geographical activities, e.g. research of a local environmental problem or use of the Internet to investigate a current issue.

We recognise the fact that there are children of widely different abilities in Geography in all classes and we provide suitable learning opportunities for all children by matching the challenge of the task to the ability of the child. We achieve this by:

- setting common tasks which are open-ended and can have a variety of responses;
- setting tasks of increasing difficulty, some children not completing all tasks;
- grouping children by ability in the room and setting different tasks to each ability group;
- providing resources of different complexity according to the ability of the child;
- using teaching assistants to support the work of individual children or groups of children.

Geography curriculum planning

Our curriculum planning is in three phases (long-term, medium-term and short-term). Our long-term plan maps the geography topics studied in each term during each key stage. The geography subject leader works this out in conjunction with teaching colleagues in each year group. In some cases we combine the geographical study with work in other subject areas, especially at Key Stage 1. At other times we arrange for the children to carry out a geographical study independently.

Our medium-term plans are creative using the objectives and country suggestions provided by the new National Curriculum for our topic units covered each term. The geography subject leader reviews these plans on a regular basis.

We plan the topics in geography so that they build upon prior learning. Children of all abilities have the opportunity to develop their skills and knowledge in each unit and, through planned progression built into the scheme of work, we offer them an increasing challenge as they move up the school.

Foundation Stage

We teach geography in reception classes as an integral part of the topic work covered during the year. As the reception class is part of the Foundation Stage of the National Curriculum, we relate the geographical aspects of the children's work to the objectives set out in the Early Learning Goals (ELGs) which underpin the curriculum planning for children aged three to five. Geography makes a significant contribution to the ELG objectives of developing a child's knowledge and understanding of the world through activities such as collecting postcards from different places, singing songs from around the world, or investigating what makes a 'good' playground.

Assessment and recording

We assess the children's work in geography by making informal judgements as we observe the children during lessons. Once the children complete a piece of work, we mark and comment as necessary. We use this information to plan future work. At the end of the unit of work, the teacher makes a summary judgement about the work of each pupil in relation to the expectations stated in the end of year assessment document, stating whether the child is expected, emerging or exceeding. We use this to inform future planning and we pass this information on to the next teacher at the end of the year.

Resources

We keep the geography resources in a central store. In the library we have a good supply of geography topic books and a range of educational software to support the children's individual research.

Fieldwork

Fieldwork is integral to good geography teaching and we include as many opportunities as we can to involve children in practical geographical research and enquiry.

At Key Stage 1 we let all the children carry out an investigation into the local environment and we give them opportunities to observe and record information around the school site. At Key Stage 2 the children do a study of the local area. We also offer them the opportunity to take part in residential visits to Rippledown and Swattenden.

Monitoring and review

The geography subject leader is responsible for monitoring the standard of the children's work and the quality of teaching in geography. The geography subject leader is also responsible for supporting colleagues in the teaching of geography, for being informed about current developments in the subject, and for providing a strategic lead and direction for the subject in the school.
