

# Mereworth Community Primary School

## Computing Newsletter May 2019

Here at Mereworth Community Primary School, the children are continuing to use the 'Purple Mash' scheme of work during their computing lessons and are loving the variety of programmes available for them to explore.

Year 2 created impressionist paintings of the African landscape.

'I liked being able to shade using the computer'. Lilly Y2

Year 5 have been creating their own games.

'I liked how I could create a whole new game that is different from all of the ones I have played so far. This was the best unit yet!' Jack Y5

### Digital leaders

Our digital leaders have been working hard to create the Mereworth School newspaper. This has been a real hit with all of the classes who have been eager to read about all the things going on in school.

Last term our digital leaders visited Discovery Primary School as part of a collaborative project exploring different types of technology and how we use them in school.

More news on this soon...
