

Week Beginning- 18/05/2020

English Challenge

This week you are going to write your own fairy tale! Think back to the story map you created last week. Hopefully you have some really good ideas for your fairy tale now. Make sure you follow your plan. I am very excited to read some of these!

Try to remember:

- Your best cursive writing
- Finger spaces
- Capital letters and full stops
- Adjectives
- Your 'ed', 'ing', 'est' and 'er' endings

Extra challenge:

Can you include an exclamation mark and a question mark in your story?

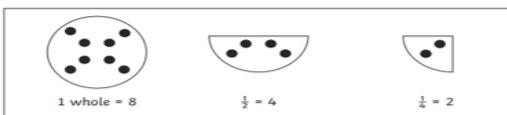

Maths Challenge

This week we are learning about fractions. First make sure you know how to split a shape into a half and a quarter. You could do this practically with cakes or pizza. We must know our two stem sentences:

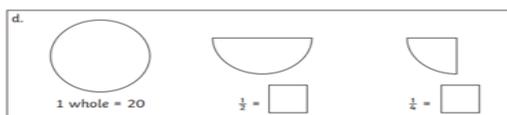

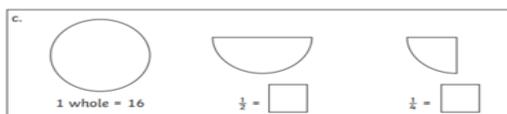

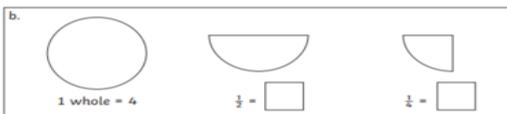

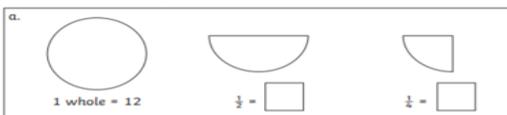

- A half is when a shape or amount has been split into 2 **equal** parts.
- A quarter is when a shape or amount has been split into 4 **equal** parts.

I have also included a PowerPoint. It is important that you recognise the symbols for both halves and quarters. Then complete the attached worksheet.

Find half by dividing a number into two equal parts.
Find a quarter by dividing a half into two equal parts.

1. Find a half and a quarter of each of these numbers.
Draw circles to help you.

Extra challenge:

Problem solving questions:

Miss Watts has 22p and needs to give $\frac{1}{2}$ of this to her daughter. How much does she have left?

Mrs Reynolds has 16p and she needs to share it out between her family. How much do they have if they get $\frac{1}{4}$ each?

SUPER HARD CHALLENGE:

Miss Holness has 40p. She gives away $\frac{1}{2}$ to her friend. Then another friend comes along and asks her for $\frac{1}{2}$ of what she has left. How much does Miss Holness have now?

Science Challenge

As we move from Spring to Summer at the end of this month, have a think what might change. One of the things that we might notice is how the length of the day changes. When I wake up in the morning it is really light now but when I was getting up at Christmas time, I remember some very dark mornings! What about when you go to bed? Is it still light?

Have a look at this video. See if you can spot each of the seasons. <https://www.bbc.co.uk/teach/class-clips-video/the-changing-seasons/zh4rkmn>

Then have a look at the PDF. Look at the table at the end of the PDF. This shows the number of daylight hours for each month. I have simplified this for you to the right. Complete the pictogram (template attached) to represent this data in a different way. Perhaps someone at home could then ask you some questions about your data such as:

- Which month has the highest number of sunlight hours?
- Which month has the lowest number of sunlight hours?
- How do you know that there were more sunlight hours in Autumn than Winter?
- How many more hours are there in Summer than Winter?
- What happens to the number of hours of daylight from Summer to Autumn?

Spring	11
Summer	16
Autumn	11
Winter	7

Topic Challenge

Find out all about England. See if you can find out:

- The capital city
- Some famous landmarks
- The national flower
- Any other interesting facts

Create a piece of non-fiction writing to tell me all about England. Remember all the features of non-chronological reports:

- Title
- Subheadings
- Pictures

Curriculum Challenge

P.E – It is so important that you exercise because it keeps you fit and healthy and it makes you feel good inside too. Have a look at the PowerPoint and discuss all of the benefits of exercise. Then see if you can complete an exercise plan. I have attached a template should you wish to use it but you absolutely do not have to! You might want to draw pictures instead or take photographs. It is up to you.

A note from Miss Watts

Please remember I would love to see the work you have created. I will be at school all of next week with Mrs Reynolds and would love to share some of the work with her too. Please send this to me on the class email address Class1@mereworth.kent.sch.uk

I hope you are all doing okay but if you need anything at all do not hesitate to get in touch. Remember, the activities that have been given as additional resources are optional. If you want to complete the learning in a different way, that is fine too.

Take care,

Miss Watts
